To: Unit Owners and Renters

Ref: Main Water Shutdown Schedule April 6th at 8:00 am

To all unit owners and Renters,

Due to the repairs required for the pool house and #411 water mains, the entire water system will be shutdown on April 6th at 8:00 am. Please turn off the main shut-off valve on the inside of your unit prior to the 8:00 am start. This will reduce the time it takes to drain the system and perform the needed repairs.

Please be prepared for an 8-hour shutdown although we expect it will be much less than that. We will notify everyone once the water has been turned back on. Once it is back on, please open your main valve and your faucets to remove any air that may be in the system.

Thank you in advance for your cooperation.
